Manual Account Configuration – Android 6.x.x

To set up Private Email account via IMAP protocol, do the following:

Open Settings of your Android device and tap on **Accounts** menu in section Personal.

![Settings menu](image)

Tap on **Add Account** at the very bottom of the screen:
On the next screen you will need to choose whether you wish to configure IMAP or POP3 account.

Please tap on **Personal (IMAP)**.
The next screen will prompt you to enter your email address. Make sure to type in full Private Email address:
Once done, tap **Next** to proceed to the next step.

Here you will need to indicate your email account password.
Here you will need to type in correct IMAP settings.

Make sure to use the following settings for IMAP:

Username: your username (shorten the email address entered earlier so it will contain just the user name not your full email @ address)

Password: password for this mailbox

Server: imaps.hevra.haifa.ac.il

IMAP Port: 993

Security Type: SSL/TLS

Once done, tap Next to verify the settings and proceed to Outgoing Server settings menu.

Here you will need to fill in the corresponding fields as shown below:
SMTP Server: smtp.hevra.haifa.ac.il
Port: 465

Security Type: SSL/TLS
Username: your username (not your email @ address)
Password: password for this mailbox

Once ready, tap Next to verify SMTP settings and finish the account setup:
You may now begin writing and checking your mail.
